PHILIPS

Highlights

Voice-activation function

Voice-activated recording is a convenience feature for hands-free recording. When enabled, recording will start automatically when you start speaking. Recording stop automatically after you stop speaking and restart automatically when you start speaking again.

Plug and play

Just plug your recorder into your PC and play in Windows and Mac OS.

Large backlit display

The large graphical display lets you view all important file information at a glance, even in poor lighting conditions, thanks to the backlit display.

4 GB memory built-in

The large graphical display lets you view all important file information at a glance, even in poor lighting conditions, thanks to the backlit display.

Micro SD memory card slot

Virtually unlimited recording capacity thanks to a micro SD memory card slot supporting up to 32 GB of additional memory.

Extra long battery runtime

The batteries of the new recorder last for up to 42 hours for extra long recording sessions.
